POV: when Lightning Talk is due tomorrow

# Claude Opus 4.6

Let's get started.

# For starters

- update [readme.md](#)
- create plan of work
- choose direction - what I want to do?

## **Work to be done:**

- move to feature-based architecture
- minor styling changes
- major information architecture changes
- add CI to existing CD
- add security scans
- consider next steps

**DEMO**

# **Tips & Tricks**

## Baseline docs

- CLAUDE.md with technologies used and good practices description
- Detailed Readme for reference
- Plan of work
- Summaries of work done

Remember to regularly update files when necessary.

# Good practices

- TDD approach
- use SOLID (or other approach like OOP, DRY) for reference
- you can ask AI to work in Scrum, organize work in sprints and make small PRs (up to 1h) - easier to plan, but not perfect

# Tricks

- Prompt AI to ask additional questions
- Implement CI for additional checks (linters, security scans)
- Always read code (and ask for improvements if necessary)

## Skills to focus on

- General coding skills
- DevOps
- Security / DevSecOps
- A11y, SEO, optimization - whatever is necessary
- Architecture patterns
- Testing
